Rudraksh Kottalwar

Computer Science Student | Full-Stack Developer

India | rudraksh7709@gmail.com | github.com/inxane-rudrakxh | rudrakshkottalwar.is-a.dev

PROFESSIONAL SUMMARY

Computer Science student and full-stack developer focused on building practical, user-centered web applications, Android experiences, and AI-powered products. Brings hands-on project experience across frontend development, backend APIs, database-backed workflows, deployment automation, and product-oriented UI design.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, responsive UI development

Backend and Data: Node.js, Express, REST APIs, MySQL, MongoDB, Firebase

Mobile and AI: Android application development, AI-powered product workflows

Tools and Practices: GitHub, CI/CD concepts, Figma, Framer, prototyping, accessible and user-focused design

SELECTED PROJECTS

SecureVault V2.0 | Secure file storage application

- Built a secure, user-focused file storage experience with drag-and-drop file handling and metadata visibility.
- Designed the workflow around clear file management and a straightforward interface for everyday use.
- Project: secure-vault-sepia.vercel.app | Code: github.com/inxane-rudrakxh/secure-vault-v2-main

FindMySubsidy | Interactive subsidy discovery platform

- Created an interactive India map to help users discover state-level subsidies through a more approachable browsing experience.
- Focused on information architecture and accessible UI patterns for navigating region-specific data.
- Project: find-my-subsidy.vercel.app | Code: github.com/inxane-rudrakxh/state-subsidy-finder

SkillGap AI | AI-powered learning roadmap tool

- Developed a skill-gap analysis concept that produces personalized learning roadmaps.
- Combined a TypeScript web experience with an AI-oriented product approach to make career and learning goals actionable.
- Project: skill-navigator-seven.vercel.app | Code: github.com/inxane-rudrakxh/SkillGap

AutoFix.sh | AI-powered CI/CD deployment agent

- Built an AI-powered self-healing deployment agent concept aimed at more resilient CI/CD workflows.
- Explored automation patterns that support reliable delivery and practical developer operations.
- Project: autofixsh.vercel.app | Code: github.com/inxane-rudrakxh/AutoFix.sh

EDUCATION

Computer Science - Current student, India

Focused on software development, modern web technologies, Android applications, and AI-powered tools.
